SCOPE OF PERFORMANCE

Consulting and planning

We develop the appropriate concept for you to meet your crack detection requirements. Take advantage of our competence in the selection of suitable solutions for:

- Magnetic particle crack detection systems
- Penetrant testing systems
- Multi-circuit magnetization for workpieces with large dimensions and complicated geometries

Manufacturing and delivery

We offer complete solutions for many areas of application. Our standard delivery program includes:

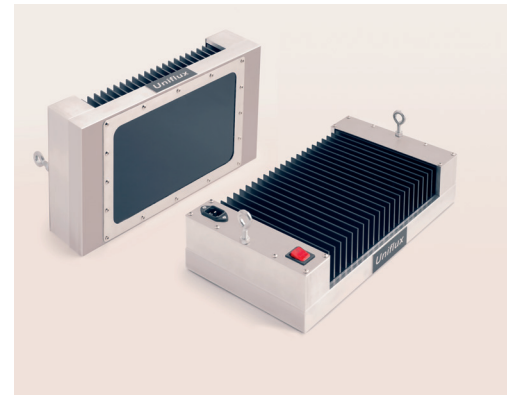

- Magnetic particle test benches
- AC yokes
- Portable and mobile high current generators
- UV-Lamps and darkened inspection cabins
- Demagnetizing coils in table design, trolleys and conveyor belts

Spare parts and service

We guarantee you comprehensive service, even for products from other makes:

- Regular maintenance and servicing
- Recalibration of field strength and UV-intensity measuring instruments
- Spare parts such as copper contacts, bulbs, filter glasses etc.
- Inspection consumables for penetrant testing and magnetic particle crack detection under UV light or daylight
- Test pieces, test strips and reference pieces

Trainings and seminars

We support you in training and further education in the field of nondestructive material testing. We will be happy to advise you and develop a company-specific training plan.

- Introduction and basics of magnetic particle crack detection
- Testworker course: magnetic particle crack detection

UNIFLUX — YOUR SPECIALIST FOR CRACK DETECTION

Uniflux stands for high-quality and powerful magnetic particles test benches and mobile units, which allows to make a nondestructive material test accordingly to the magnetic particles testing principle.

LET US CONVINCE YOU.

POSITION

Uniflux is quality! Our equipment and systems are used worldwide by well-known customers with the best success.

SERVICE

Our qualified personnel with their many years of experience guarantee an unsurpassed customer service.

UP-TO-DATENESS

We are always oriented to the latest scientific findings and technical possibilities.

FLEXIBLE

Individual consultation directly at the factory - also directly at your site.

ADDED VALUE

Uniflux products help the customer to improve quality, prevent complaints and improve reputation and image.

EXPERIENCE

As a team of highly qualified specialists we have decades of experience in consulting, development and production of crack detection units and systems.
